# Introduction

While I share my personal experience about the No-Carb Diet, it doesn't conclude that it is a diet for no-carb eaters only. Anyone can enjoy these foods.

These recipes use familiar ingredients turned into food options that are excellent for no-carb eating. However, you will find that I swapped certain ingredients with some others that may sound strange to the ears. Below, I explain these further.

Scan through the recipes with a relaxed mind, aim for something amazing, and enjoy the journey as you walk through them. It is promised to be a fun time with excellent health results exploring no-carb ingredients.

**Some foods to eat on the no-carb diet:**

- Green and above the ground vegetables: Asparagus, cauliflower, olives, onions, scallions, Brussel sprouts, okra, jalapenos, eggplants, tomatoes, green beans, arugula, bok choy, rapini, mushrooms, kale, spinach, collard greens, bell peppers, cabbages, zucchinis, shallots, etc.
- Healthy Fats: Olive oil, coconut oil, avocados, butter, heavy cream, cheeses, cooking cream, unsweetened almond milk, unsweetened cashew milk, unsweetened coconut milk, etc.
- Protein: Red meats, seafood, tofu, tempeh, soy chorizo, low-carb protein powders.
- Seeds and Nuts: Almonds, peanuts, pistachios, cashew nuts, sunflower seeds, walnuts, sesame seeds, chia seeds, macadamia nuts, hemp seeds, pumpkin seeds, peanut butter, etc.
- Herbs, Spices, and Seasonings: Oregano, basil, dill, tarragon, cloves, bay leaves, parsley, rosemary, marjoram, thyme, chives, salt, black pepper, etc.
- Low—Carb Fruits: Avocados, strawberries, blueberries, raspberries, blackberries, goji berries, coconut, and olives.
- Safe Condiments: Sugar—free versions of maple syrup, mayonnaise, Worcestershire sauce, tamarind sauce, chimichurri, etc.
- Drinks: Water, berry smoothies, tea, latte, coffee, lassi, low—carb wines, fresh low carb fruit juices, etc.

### **Explaining strange ingredients:**

- Almond & Coconut Flours: Both low-carb flours replace the use of all-purpose flour and regular flour.

- Erythritol, Swerve Sugar or Sweetener: Zero calorie, zero carbs, naturally derived sugar, non-GMO and non-glycemic, which replaces regular sugar.
- Arrowroot Starch & Xanthan Gum: Grain—free, zero carb starch powder, and gluten-free starch that are replacements for cornstarch for thickening sauces and stews

Are you ready to rock ‘n’ roll? Let’s get on with it then!

**Instructions:**

**For the grilled pork loins:**

3. Preheat the grill to 450 F and take out the meat. Remove the wrap and put the pork on the grill. Cook for 2 minutes on each side. Reduce the temperature, brush the top of the meat with the barbecue sauce mixture, cover the lid and grill for 3 minutes. 8. Boil the water in a large saucepan over medium heat and place one quenelle in the water. If the quenelle rises to the top of the water without breaking, you can continue making the remaining quenelles. If it breaks, crumble the other quenelles in the bowl, add one 1 to 2 tablespoons of almond flour, mix and re-mold the quenelles.

9. Add the some to the boiling water and continue poaching until the quenelles rise to the top. Using a slotted spoon, remove the cooked quenelles onto a serving platter, and cook the remaining quenelles.

10. Divide into 4 plates and set aside.

11. Place the butter in a small safe microwave bowl and melt in the microwave for 30 seconds. Take out the bowl and drizzle the butter all over the quenelles. Sprinkle with extra Parmesan cheese.

# About the Author

*April Blomgren*

Hello everyone! Are you ready to grill tonight? My name is April and I love to cook and entertain friends and family almost every weekend. If you share my passion for great food, easy preparation time but mouthwatering results, you and I are going to get along just fine!

I think a successful meal among loved ones is based on a few key factors: fresh ingredients and appropriate cooking method. Some meats for example, can truly benefit from being marinated overnight, and will be at their best prepared on the grill. Another aspect of cooking I must insist on, no matter what your cooking style is: rely on the use of herbs and spices. Please favor fresh herbs each time you can. However, I understand that it

may be difficult during certain periods of the year, so simply keep a well-stocked pantry of dried basic herbs and spices such as cinnamon, nutmeg, basil, oregano, thyme or any other favorites.

Finally, once you embark that exciting culinary journey with me, you will realize that simplicity is also one of my allied. Don't overthink when cooking. Inspire yourself of recipes, have fun doing it and taste as you go. Sure, you might once in a while burn a few pork chops or use too much salt in your sauce, you are just human. Cooking is not about succeeding every time, it is about the opportunity to learn and get better. Don't be afraid to taste your dishes along the way, adjust the seasonings and serve accordingly.
